

Suggested Sheetfilm Processing Times

Note: These times are only suggested starting points. You may wish to vary these times according to your own experience and preferences.

Caution: Push-processing (up-rating) films is liable to result in increased grain and contrast. Use of a higher speed film may give better results.

Agitation: Continuous for first minute, then 5 seconds at 30 second intervals.

Agitation : 5 seconds at 1 minute intervals.

Developer & Dilution	D76 D/Tank
-------------------------	---------------

Kodak

Tri-X	(400iso)	7
Plus-X	(125iso)	8
T-Max 100	(100iso)	9½
T-Max 400	(400iso)	10
High-speed Infra-red		12

Ilford NOTE - Agitation : 10 seconds at 1 minute intervals.

FP4 Plus	(125iso)	5½
HP5 Plus	(400iso)	10
